

G1 81a O bizu dos bicos 1**Veja o exemplo. Calcule x. (r // s)**

[25 cada]

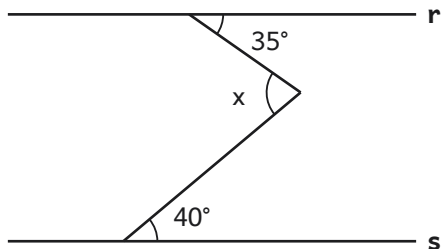

Exemplo

bico para a direita:

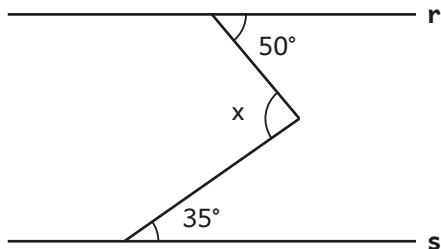

$$x = 30^\circ + 40^\circ = 70^\circ$$

O ângulo do bico é a soma dos ângulos nas paralelas.

3

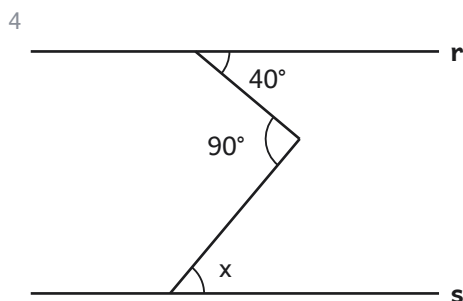

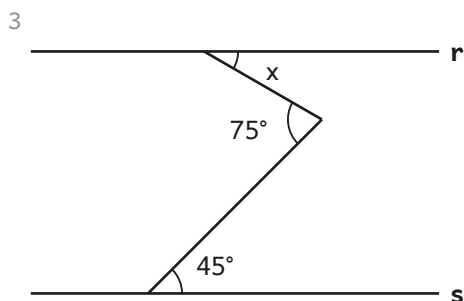

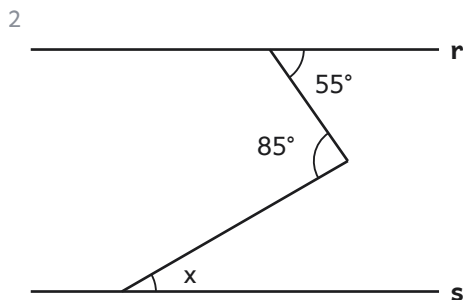

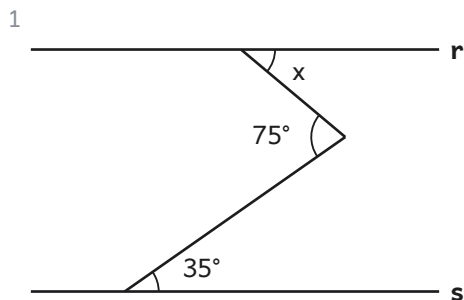

4

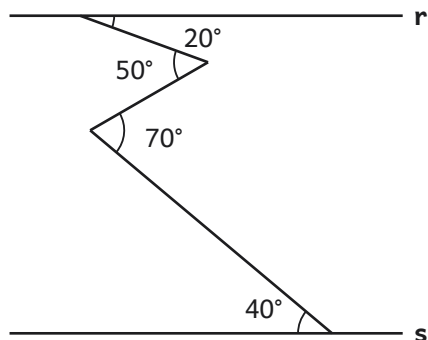

G1 81b O bizu dos bicos 1**Agora o x está na paralela. Calcule x .**

[25 cada]

G1 85a O bizu dos bicos 5**Dois bicos. Veja o exemplo e calcule x.**

[25 cada]

Exemplo

abrem para a esquerda:

$$50^\circ + 40^\circ = 90^\circ$$

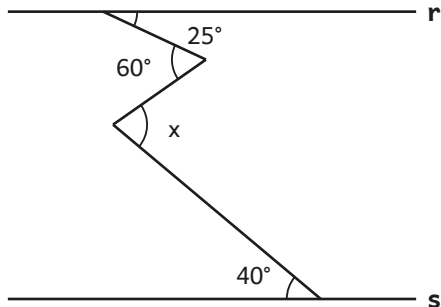

abrem para a direita:

$$20^\circ + 70^\circ = 90^\circ$$

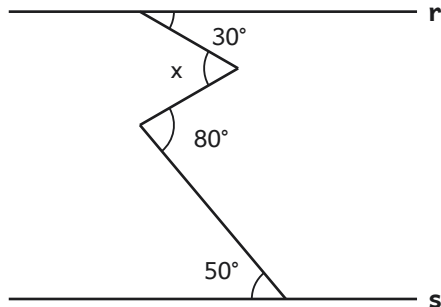

as duas somas são iguais

Olhe para onde cada ângulo abre.

2

G1 89b O bizu dos bicos 9**Questão de prova. Marque a alternativa.**

[100]

Na figura, as retas r e s são paralelas.

O valor de x é:

(A) 15° (B) 20° (C) 25° (D) 30°
